33 responses

What was your main positive experience with regard to your participation at the MECO 2019 conference?

13 responses

- Friendship
- Best quality conference
- Excellent networking, excellent organisation, very good communication between participants.
- Open and cooperative spirit of event organization and attendants
- Networking with colleagues
- Observe the latest projects, meet specialists in the field of CPS and IoT and be in a very nice place where we could enjoy after the course.
- Very good organisation, quality papers and participant from different fields.
- Excellent presentations and CPS workshop.
- People
- Good location and organization
- Very good networking
- social life and quality of conference in respect to facilities and excursions
- Tuesday evening town excursion was very nice.

What was your main negative experience with regard to your participation at MECO 2019 conference?

13 responses

please don't spam all authors of a paper with information emails for attendees. authors and attendees are overlapping but distinct sets of people.

Poor English

No negative experience

No negative experience at all.

Starting day collided with Monday after Pentecost which is a holiday in some countries and made attendance tricky

Nope

Presentations too long in summer school, more than a school I think it was a small conference. I would have liked to have been taught some methodology or tool.

There was not negative experience.

-

No negative

/

I have not this

nothing

Please, provide us with any comments/suggestions, which can be useful for preparing MECO 2020 conference.

Continue like that in future

1. To advice chair of sessions to finish their session based on time table and to prepare for all of them printed A4 paper with information 5 minutes and 1 minute to be finished the oral presentation from the presenters.

2. 12 keynote speakers are to much for the conference. I think quite reasonable number will be 6 keynote speakers.

3. Based on previous years papers, keynote speakers to be selected as top level in academia, research, or industry to support participants for their future research work.

Keep going this way. MECO is an excellent event. Perhaps add panel on some hot topic...

It would be great to learn new skills in the summer school. Something like a "Crash Course" in some technology, tool or methodology. That would definitely power up the student subscriptions and their satisfaction.

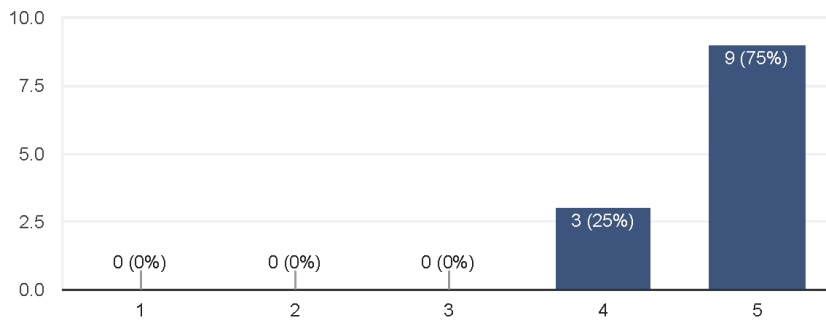

Do not change the venue cause the location is great.

Good place, do not change this venue

Be happy

Please, do the evaluation of Summer School of Cyber-Physical Systems and Internet-of-Things CPS&IoT if you were an attendee of the school?
